Interactive Digital Art and Design SE608
Weekly Meeting Log

Week Starting:	October 19th To October 25th 2026			
Meeting Details	**START TIME**	**13:15**	**END TIME**	**13:29**
Student Name:	Liam Treacy			

Description of work completed since previous meeting Notes : Also record project backlog, use notes page as required
This week Muhammed and I met on Wednesday. I showed him my progress. We discussed what was next and on my Gantt Chart. I plan to spend a month trying to get a whole level 01 done, this would include some placeholder models but also have finished models to give a strong visual identity. The game is running well but has some slight bugs and issues, which is to be expected. After the meeting, there was a bit of an overhaul, the test scene has been changed to be more close to the final level, so I added a road, blown out building, an apocalyptic looking sky and other test models. I want to really add also the ability to pick up items, which is my next focus.

Tasks to be completed this week **Notes: record any additional tasks on notes page as required.**	
1	Add an equitable item.
2	Change perspective and add a test model.
3	Keep building up the new scene.
4	Create more FBX models.
5	Polish and fix bugs and issues.
6	

Supervisor Comments
Muhammed would like me to keep working as I am. Some notes included making my weekly logs more detailed. Muhammed also wanted a test model to show the game from a 3rd person perspective.
